

# **Principles of Design:**

## **Repetition & Pattern**

# Repetition & Pattern

**Repetition** forms when an **Element of Art is repeated**, such as line, color, shape, texture, value or image tends to unify the total effect of a work of art **as well as create rhythm**.

**Patterns** form from these repeated elements.

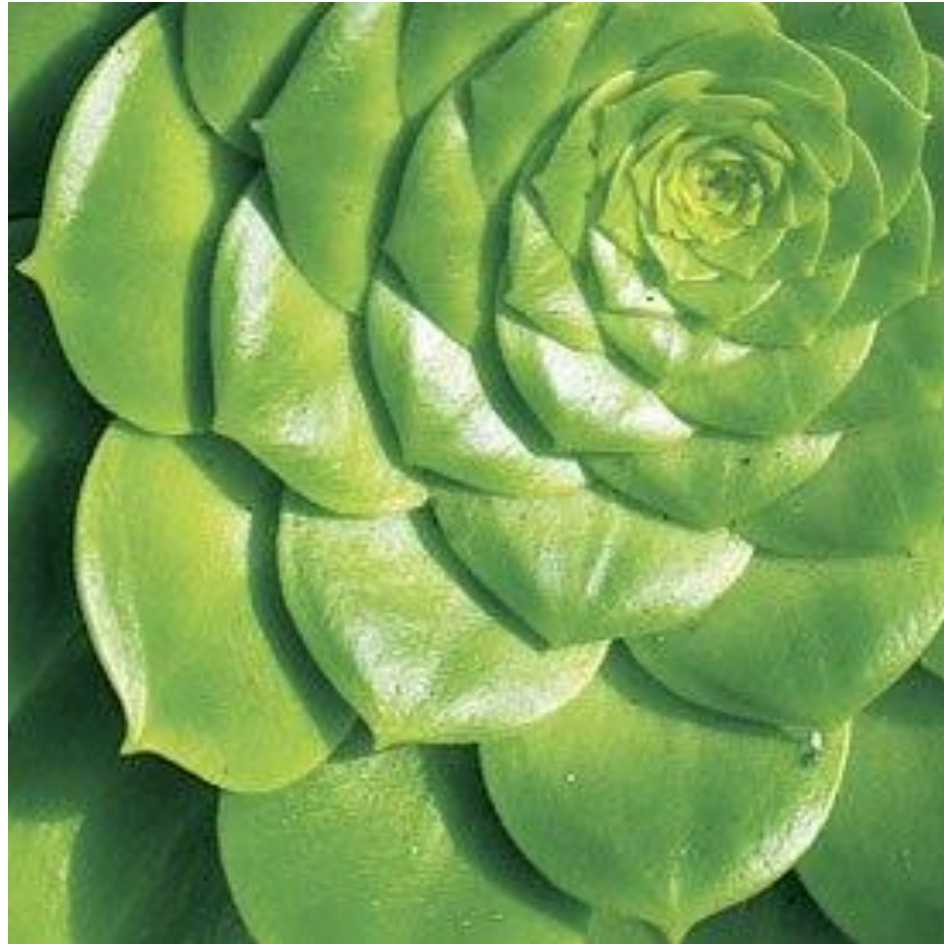

**Balance and Unity** can also be achieved from using Repetition in a work of art.

Repetition can take the form of an **exact duplication (pattern)**, a near duplication, or duplication with variety.
